Summary of Findings

Key Findings Understanding Trauma-Informed Practice

Trauma-informed practice is part of a spectrum (diverse range) of well-being

Trauma-informed practice is a journey, not a destination:

Tangible acts and actions matter more than terminology:

The recognition of the relevance of trauma-informed practice has been galvanised by the pandemic

Key Findings Implementation of Trauma-Informed Practice

Trauma-informed practice was found to be applied by our interview participants based on 5 key areas of implementation

Leadership matters:

Policies & procedures are essential

The physical environment is also important

Gaps remain in the evidence for and impact of trauma-informed practice
